Detailed basic instructions for setting up Takion

1) Download the installer

Download Takion from your personal account https://pc.fondexx.pro/

2) Enable Cisco VPN

VPN should be entered in the search on the desktop. It is installed, but there is no shortcut on the the desktop.

In the new window that appears, enter your login (for example, zidemo+number) and password for the VPN. You can find it in your personal account.

3) Open Takion

Before launching Takion-demo, select the Simulation (For Demo) button. Leave it as it is (for real accounts).

You need to enter your account password and login (also available in your personal account). In the Takion window (Picture 1), mark the required servers with a cross:

64	Ta	aki	on	1.	.0.	6.1	42	-	UDEM	\$\$\$\$\$\$\$\$

Picture 1

5) Enable trading

Go to the Settings (Settings as - instructions below), enable trading: Click on the red Allow trading (picture 2) - there should be a checkmark.

Picture 2

6) Setting up Buying Power (BP) (picture 3)

Set up BP in the two marked points on the picture (use the arrows to select arrows instead of 0.00).

After BP is set up, click on the **Update** button (above 0.00) and **Ok** (right corner) - there should be a cross in both boxes.

7) Download the Layout

To get the Takion Layout, please contact the technical support chat @fndxsupport After downloading the Layout, add it to Takion.

To do this, you should right-click on the platform field, select Layout -> Open options and select the file with the Takion Layout (Picture 4).

Picture 4

!!! Please note!!! When you download the Layout, you automatically have already certain HotKeys automatically appear, namely:

Buy limit (5)

8) Hotkeys settings

Right-click on the main window of the platform and select "Settings" from the window of options. An example of the settings for Sell limit:

Picture 12

By right-clicking on the platform, you will see the settings window where you can change the platform settings.

Picture 13
